

Edikan Ekong - Data Engineer

Eddieanddata@gmail.com | 343.448.1205 | [LinkedIN](#)

SKILLS

Languages

Python • SQL •

Bash

Data Engineering

ELT/ETL • Data Modeling •

Data Transformation • Data

Quality • Data Warehousing

• Schema Design

AI Tools:

ChatGPT • Codex • Cursor

Cloud & Platforms

Snowflake • SQL

• AWS

Orchestration & Transformation

DBT • Airflow

Development Tools

VScode • GitHub

Analytics & BI

Looker • Tableau • Excel

Collaboration

Zendesk • Jira

EDUCATION

University of Ottawa

MENG IN COMPUTER
ENGINEERING

Sept 2020 - June 2024 |
Ottawa, ON

PROFESSIONAL EXPERIENCE

- Early-career Data Engineer with hands-on experience building ETL pipelines and data models using Python, SQL, AWS, Snowflake, dbt, and Airflow. Skilled in transforming raw data into analytics-ready datasets for reporting and decision-making. Experienced in improving data reliability and supporting cloud-based data workflows. Strong foundation in data warehousing, SQL development, and cross-functional collaboration.

EXPERIENCE

SOLINK | SENIOR SaaS TECHNICAL SUPPORT SPECIALIST

March 2023 – Current | Ottawa, CA

- Built an AWS S3 → SQL → Looker analytics pipeline that transformed NAS monitoring from reactive to proactive, reducing downtime by 20%.
- Improved operational efficiency by 10% by maintaining and validating AWS NAS environments through upgrades, audits, disk checks, and disaster recovery testing.
- Partnered with DevOps and engineering teams to diagnose and resolve data pipeline and integration issues across cloud and on-prem environments, improving pipeline and application reliability.
- Automated troubleshooting and operational workflows with scripting and AI-assisted tools, improving team efficiency by 10% and accelerating issue resolution.
- Performed Linux and network diagnostics during high-severity incidents to identify root causes, validate AWS service connectivity, and restore service quickly.

E-HOSPITAL PROJECT, UOTTAWA | DATA ANALYST

May 2022 – July 2023 | Ottawa, CA

- Designed and implemented star-schema data models in SQL Server, building fact and dimension tables from multi-source relational data for downstream analytics.
- Built and maintained ETL pipelines to extract, clean, transform, and load data into analytics-ready warehouse tables, ensuring consistency and usability for reporting.
- Automated recurring data preparation and refresh workflows using SQL-based cleansing, normalization, deduplication, and referential integrity checks, and collaborated with stakeholders and developers to deliver scalable data models, pipelines, and Tableau dashboards, improving reporting efficiency by **15%**.

EXXONMOBIL | MAINTENANCE DATA ANALYST

February 2021 – December 2021 | Nigeria

- Managed role-based data access controls for business-critical datasets, supporting secure and governed access to reporting data.
- Built and maintained ETL/ELT workflows using SAP queries, MS SQL, and Excel to extract, clean, and consolidate operational data for analytics and KPI reporting.
- Integrated data from multiple systems into executive reports and analytical dashboards, improving performance by 15% and resource efficiency by 10% through cross-functional collaboration.
